(This information will also be available as a clarification in DOMjudge)

Desktop Environment

- Samples are available in your home directory: `/home/team/samples.zip`
- Address sanitizer should now work out of the box
- gdb will no longer ask about debuginfod – debug to your heart's content
- Alt + Mouse wheel will no longer zoom in/out the desktop

Desktop Environment

- Samples are available in your home directory: `/home/team/samples.zip`
- Address sanitizer should now work out of the box
- gdb will no longer ask about debuginfod – debug to your heart's content
- Alt + Mouse wheel will no longer zoom in/out the desktop
- ...scrolling the mouse wheel will switch between virtual desktops instead
- Just keep scrolling or use the workspace switcher on the top right to switch back

IDEs and Editors

- Vim plugin is now disabled by default.
You are invited to re-enable it in your IDE's settings
- Type `deactivate` to leave the virtual environment in PyCharm
Then you can use the submit client
- We cannot provide any further support for IDEs
- We've heard that "Repair IDE" can work wonders
- If it doesn't, compile and run from the command line
